ABOUT US

Our company directly have agricultural producers network today in Turkey due to her four seasons diverse climatic conditions. We are interested in supporting small and medium size farmers to develop their production processes according to natural, organic agriculture and process their products in accordance to markets demand.

Sustainable agricultural activities, environmental care and increase farmer product ranges;

to find new markets for their products are what we mainly purpose in our business with our experiences in international platforms and with multinational company corporates.

ANGELO SOLUTION

Herbs . . .
